

Declaration of Practice and Transferable Skills

I declare that I am clinically proficient to safely administer intravenous medication and have successfully completed the CapitalNurse IV Therapy Passport pathway.

I understand that I am considered proficient in the skills for which I have achieved proficiencies as detailed in the Record of Achievement in this passport. I understand that if I transfer to another organisation, I can transfer with these skills.

As an NMC or HPCP registrant, I understand that I am responsible and accountable for my IV therapy practice and am aware that I should bring to the attention of a more senior member of staff where I feel I do not have sufficient knowledge or skills to carry out any aspect of IV medication administration.

I understand that I must practice according to organisational practice guidance and policy.

Professional Development

I understand that if my role changes, I may need to expand my skills to meet the requirements of the next role. To do so, I would need to return to this passport to complete additional proficiencies from the Methods of Preparation, Methods of Administration or Vascular Access Device Proficiencies after discussion with my line manager or clinical practice educator.

I understand that I must ensure I meet the pre-requisites to clinical practice (page 10) in any organisation I work.
